| Supply Charge   |                                   | cents/day | 91.00     | 100.100   |
| <b>Controlled Load</b>  |                                   |           |           |           |
| Controlled Load   |                                   | cents/kWh | 21.90     | 24.090    |
| <b>Actual Demand</b>  |                                   |           |           |           |
| Peak  | 7am - 9pm Mon-Fri                 | cents/kWh | 34.80     | 38.280    |
| Off-Peak  | 9pm - 7am Mon-Fri and all weekend | cents/kWh | 23.90     | 26.290    |
| Demand Charge Peak*   | Monthly Demand                    | c/kVA/day | 37.80     | 41.580    |
| Demand Charge Off-Peak^   | Monthly Demand                    | c/kVA/day | 0.00      | 0.000     |
| Supply Charge   |                                   | c/day     | 118.00    | 129.800   |

\* Peak Monthly Demand applies from 12pm - 9pm Mon-Fri.

^ Off peak demand applies at all other times.

## Powerdirect Reference Comparison

**What does this mean for the average customer?** Following the introduction of price regulation, electricity retailers are now required to tell residential and small business customers about how their electricity rates would compare to the benchmark “Reference Price” set by the AER for an average customer. An average residential or small business customer is someone in a particular distribution area (e.g. SA Power Networks), on a particular type of tariff (e.g. single rate), who uses the average annual household / small business consumption determined by the AER. Where an energy plan includes different components (i.e. controlled load and time of use), the AER has also specified how the average annual usage should be split between these components. Keep in mind that the figures in this section are estimates only and based on the usage patterns of an “average customer”. Your electricity costs may be significantly different depending on your own actual usage.

| Tariff                                       | Average Annual household usage | Estimated annual cost (incl. GST) | Comparison to Reference Price |
|--|--------------------------------|-----------------------------------|-------------------------------|
| Residential Single Rate                      | 4000 kWh                       | \$1,997                           | 3% more                       |
| Residential Single Rate with Controlled Load | 6000 kWh                       | \$2,514                           | 4% more                       |
| Small Business Single Rate                   | 20,000 kWh                     | \$9,804                           | 8% more                       |

---

### **^Transitional Standard Retail Contract Rates**

If you are a residential or small business electricity customer who was on a variable rate market contract prior to 1 July 2019, your electricity supply will continue under these Transitional Standard Retail Contract rates from 1 July 2019. These rates will continue to apply to you until your energy plan ends or until we notify you otherwise.

---

<sup>1</sup>Rates subject to confirmation of distribution zone, network tariff and meter type at your supply address.

All times are in Australian Central Standard Time (ACST), unless you have an interval meter, in which case, times will be adjusted to Australian Central Daylight Time (ACDT) during daylight savings periods.
